Vibrada Token

Panthart was founded on the 1st of September 2021. We had undergone our manual Initial Coin offering Stage and also did an airdrop. Although, we have not distributed the airdrop tokens, we have sold some of our tokens to the public outside the exchange market (manually). Rest assured that the airdrop tokens will be distributed at the start of this new era.

Plans did not work out the first time, but that was not enough reason to quit we needed to correct our mistakes and come back stronger. Evidence of our establishment can be seen on our token smart contract explorer page, where some of the tokens have already been sold and distributed. We promised that we will be back. Now we are here. Stronger and better.

Future Of Vibrada Token.

As promised, all Vibrada tokens that is to be sent from our first airdrop will be sent. The tokens for Comrades and Angel Investors, will also be sent, and all this will happen before we lauch the token.

Vibrada Token will not be launched on any exchange market till we have enough lliquidity from the start to support it. This is to prevent stories that touches the heart.

Temporal Utility.

Our current Vibrada token, living in the binance smart chain has no tangible utility for now, except for exchange trading storing of assests, and some form of sharehoding for the panthart project. In the future we will integrate it with our own Afer Blockchain and all current VBRD balance transferred to the new chain.
